• Profile

As a dedicated and versatile full-stack web developer, I excel at transforming ideas into functional and visually appealing web applications. With a keen eye for detail and a robust foundation in coding and problem-solving, I am committed to delivering innovative solutions that engage users and communicate effectively.

• Work Experience

Passionate and self-driven web developer with a strong focus on React and Node.js. Independently executed various projects, creating dynamic, responsive interfaces, and robust server-side components. Proven ability to understand client needs, implement custom features, and deliver tailored solutions. Continuously staying abreast of the latest web development trends and technologies to ensure the delivery of cutting-edge solutions.
